

ERRATUM

The printed version of the article “Non-linear Dynamic Analysis of Coupled Spar Platform” by *Mohammed Jameel, Suhail Ahmad, A. B. M. Saiful Islam* and *Mohd Zamin Jumaat* published in the *Journal of Civil Engineering and Management* 19(4): 476–491, doi:10.3846/13923730.2013.768546, contained the following errors:

- The affiliations should read:

Mohammed Jameel^[a], Suhail Ahmad^[b], A. B. M. Saiful Islam^[a] and Mohd Zamin Jumaat^[a]

^a*Department of Civil Engineering, University of Malaya, Kuala Lumpur, Malaysia*

^b*Department of Applied Mechanics, Indian Institute of Technology, Delhi, India*

- On page 479 the Table 3 shows the surge, heave and pitch values in present study are 341.97, 22.60 and 43.48 respectively.” should read:
323.97, 25.60 and 59.48 respectively.
- On page 484 the sentence “The mechanical and geotechnical properties of the----“ should read:
The mechanical and geometrical properties of the----
- On page 485 the sentence “It shows the validity of the coupled mathematical model.” should read:
It shows the validity of the coupled mathematical model as shown in Islam *et al.* (2013) as well.
- On page 485 the sentence “The natural periods obtained by Chen *et al.* (2001) are 322.5, 26.2 and 54.6 sec. in surge, heave and pitch, respectively.” should read:
The natural periods obtained by Chen *et al.* (2001) are 331.86, 29.03 and 66.77 sec. in surge, heave and pitch, respectively.
- On page 490 in Reference list the following reference should be included:
Islam, A. B. M. S.; Jameel, M.; Ahmad, S.; Jumaat, M. Z.; Kurian, V. J. 2013. Structural behaviour of fully coupled spar-mooring system under extreme wave loading, *Journal of Civil Engineering and Management* (in Press).
- On page 491 the author’s biography should read:

A. B. M. Saiful ISLAM. Is a Research Fellow after finishing PhD at the Department of Civil Engineering, University of Malaya, Malaysia. He is a member of Institution of Engineers, Bangladesh and American Society of Civil Engineers (ASCE). His research interests include offshore structures, non-linear dynamics, seismic protection, base isolation and pounding.

The Authors Mohammed Jameel, Suhail Ahmad, A. B. M. Saiful Islam, Mohd Zamin Jumaat and the publisher apologise for this error.
